Wendover Air Force Base,
Base Warehouse
(Building No. 33) C J
HABS No. UT-125-
Page 1

From a note on the December 1945 "Schedule of Buildings Cantonment & Housing Areas", this building appears to be a post-war quonset-type structure. Built of corrugated metal and metal framing, the building's sectional profile is like a semi-circle. It measures 20 feet-10 inches by 49 feet and sits on a concrete foundation. The west end has a plywood wall, but the east wall is missing. The windows are 2-pane awning types. On the roof ridge are four metal vent flues. The interior wallboard has fallen off in some areas. Though rapidly deteriorating, the building seems structurally sound. It sits due north of building 32 with its broadside facing west.
